THE Northern republica s, notwithstanding the famous "rebellion" in which their forefathers were engaged, and their threatened secession during the war of 1812, and the invariable support they have rendered rebels in all countries until the last year or two, will not forget, let alone forgive, the South for fighting for the rights guartheir accredited organs now says the United States "put down rebellion in "it," or they, as the case may be, had no right to go to war with the Filipinos, 14,000 troop; ashore. who never owed allegiance to this government, or with the people of the South, who did, but who were allowed by their contract to throw it off whenever it became oppressive.

THE republicans are apparently bent on baving a large standing army and, if it be possible, will provide therefor next winter, and the administration professes to be dreadfully afraid of the "yellow peril" on the opposite side of the globe, but is utterly oblivious to MacArthur to prepare as many the black peril at home. According to the new order of things, yellow perils in Asia demand an immense regular to the effect that the Virginia delegaarmy, both at home and abroad, but the black peril in America is a matter of no consideration.

THE simple fact that the Chinese government caused no less than one hundred and thirty of its rebellious sub facts to be beheaded a day or two ago, in order to terrorize the others and reduce them to subjection, should be sufficient of itself alone to win the sympathy of all other governments, and prove to them that it is doing all it can to restore peace and the observance of the law, and should elicit their support, rather then stimulate their enmity.

ANTI-FOREIGN placards have been posted throughout all parts of China by the insurgents there. But during the know nothing times in this country similar placards had conspicuous places on the corners and fences in many of the cities and towns here. But, for all yesterday, and wheat is lower.

THE FINE U. S. ship Oregon, on her way to take part in the invasion of China, was run aground on an island in the China sea. If her presence at the scene of hostilities had been necessary her grounding might have been disastrous to American interests, but as there was no need for her being there, the only ill effect will be that resulting from her own loss or injury.

A CONVICTED felon in the North has just had his five years' term in the State prison substituted by an enlistment in the army. And yet, some people say it is patriotic to serve in the army and that such service is honorable, even in wars of "criminal aggreesion." What can be expected of an army the soldiers of which are degraded by its own government?

STRIKES are assigned as the cause of the recent advance in the price of coal. The strikers evidently in this case don't act upon the idea than an injury to one is an injury to all, for though they may think they have been injured by their employers, the injury they inflict by striking upon their fellow workmen, and all other poor people, is incalculable.

[Correspondence of the Alexandria Gasette.] Washington, June 30. A conference at noon between the

Secretaries of State, War and Navy, which was practically a special cabinet meeting in the absence of the President, was called for the purpose of deciding whether any new instructions were necessary to be sent to any of the United States officials in China in view of dispatches of this morning. After a half hour's talk Secretary Long announced that it had been decided that no additional itstructions were necessary. He said that so far as the question of peace or war was concerned it was held that the situation was unchanged, and it was also decided not to be necessary to communicate especially with the President beyond forwarding to him copies of the several dispatches. Secretary Long concluded by saying that there was nothing to do but wait developments. Until the government could hear from Minister Conger he did not anticipate that any further action will be taken, either towards ordering more troops to

Chins or any other way.

The following dispatch of today's date from Rear Admiral Kempff was anteed it by the Constitution.
